

PRO SERIES

High-quality, oil-lubricated V-belt drive compressors with carefully selected EU-made components, designed for workshops and small industrial applications. Our four professional series (HL, HK, G, and VK) include robust, durable models with higher maximum pressure (10–14 bar) and larger tank capacity (up to 500 litres). Equipped with new-generation Chinook pumps and an advanced Condor pressure switches with thermal overload relay, they operate with 50% duty cycle.

- for intensive use in workshops
- for industrial plants
- for service centers

PRO G SERIES

Part of our PRO compressor range, the G models with galvanized air receivers are ideal for high-humidity environments and for areas exposed to corrosive vapours such as ammonia. Galvanising applies a thin protective metal layer to the air receiver, which improves corrosion resistance, extends service life and gives a clean, durable finish. The G Series compressors offer the galvanised receiver of 90–500 L (with 10-year warranty), a high-performance Chinook pump, multiple power options (4–10 HP), three-phase supply. They are also easy to maintain.

- for agriculture (dairy farms, livestock facilities)
- for chemical industry
- for car washes
- for water pumping stations
- for water treatment plants
